

MICHELE CLAIBOURN

I am a research director – a senior data scientist, political scientist, community-engaged scholar, and senior administrator – with 20 years of experience teaching, leading, and managing research and data science teams, most recently in building and leading the Research Data Services⁷ team in the UVA Library.

In the last five years, my own work has turned towards action-based research, using the tools of data science to promote accountable governance², make visible racial and other social inequities³, and impact public policy and movement building. I am always interested in opportunities to use my experience and skills towards creating a more economically and socially just world.

Consult with and design research projects for partners and clients looking to better understand racial disparities and social structures, and to design policy in response.

Founded StatLab⁴, a data science consulting service for members of the UVA community where I continue to serve as a senior consultant and mentor student fellows.

Built a new division of the library enhancing our ability to support the growing data science research community at UVA, recruiting, hiring, and managing a team with diverse skills and talents to meet emerging university research needs.

Supervise a team of 10-12 full-time staff, 3-4 graduate fellows, and teams in multiple collaborations on a range of research projects, including work on equity and COVID response in the Charlottesville community, racial disparities in the Charlottesville and Albemarle child welfare systems, forced displacement events with humanitarian partners, and additional community-oriented and library-directed data science efforts.

See my webpage⁵ for a more project-oriented and link-filled portfolio.
